

## OPERABLE WALLS

Airwall is a full service company experienced in all makes and models of operable walls. We sell, service and install walls nationally and internationally for any application—from schools to hotels and convention centers. We also retrofit old systems, refurbish panels, and create new wall designs. Our walls are easy-to-use, and durable with guaranteed acoustic control. And we offer nationwide on-site service and maintenance for all of our systems. Once we've installed or refurbished the panels, we'll train your staff on setup and operation.

## SERVICES

- ❑ **NEW WALLS** Design, installation and training of your personnel on the operation of your new walls. Electric or manually operated walls are finished with any surface: metallic, wallpaper, vinyl, carpet, texture and paint, and custom finishes.
- ❑ **INSPECTION** We inspect the entire system for wear, including: trolleys, tracks, motors, and the finished outer surface, and provide a thorough report.
- ❑ **SOUND TESTING** On-site acoustical testing with Bruel & Kjaer test equipment ensures the facility meets or exceeds sound requirements.
- ❑ **REFURBISHING** We can make your old panels look new by resurfacing walls on-site including: wallpaper, tape, texture and trim, vinyl, wood veneers, plastic laminate, chalk/marker board, wall carpet, woven fabric, paint, or the customer's custom finish.
- ❑ **RETROFIT** Replace sliders, connectors, tracks, trolleys, and panels.
- ❑ **PREVENTATIVE MAINTENANCE** Annual maintenance programs catch small problems early, and increase the life of the walls.
- ❑ **TRAINING** Airwall Technicians specialize in training your personnel in the operation and maintenance of each wall system, to ensure ease of use and a long life.
